### SESSION 1

#### AFRICA: MAPPING ENERGY DIVERSIFICATION

*An energy portfolio diversification between European importers and regional producers is a complex endeavour, also in the context of an ongoing war and, in the medium-term, the EU Green Deal. The newest exploitable resources are owned by at least a dozen countries across the African Continent, while additional six countries are among those with the biggest reserves. What are the opportunities and the risks? How to protect essential infrastructure? How to weave in renewables?*

## SESSION 2

### AU-NATO: FURTHERING A PRAGMATIC COLLABORATION

*The collaboration between the African Union and the Atlantic Alliance is gradual and pragmatic. The new energy needs suggest a common reflection on energy security of supply in a continent characterised by a high competition for primary resources and instability (Sahel, Horn of Africa, etc.). How to take into account geopolitical and geoeconomic variables in terms of energy security of supply? What are the best means and formats?*

Chair: **Nicola Graziani**, Journalist, Agenzia Giornalistica Italia, Rome

## SESSION 3

### THE CHALLENGE OF MARKET INTEGRATION

*Market integration in Africa has started at least in 2018 but, in order to ensure North-South and South-South exchanges, it also needs a cooperative security framework to achieve stability. How do market actors interact among themselves and with (inter)governmental bodies assuring energy security? How to shape market regulation?*

Chair: **Jessica Obeid**, Senior Non-Resident Fellow, Middle East Institute Switzerland, Geneva \*

- **Leonardo Bellodi**, Adjunct Professor, Luiss Business School, Rome \*
